

TAC 1 Systems Buyers Guide **Parts & Accessories For** **L3 Harris, M/A-Com, GE & Ericsson Radios**

The following pages contain offered products at discounted pricing for Federal, State and Local Government & Corporate L3 Harris & M/A-Com radio users. This pricing is confidential and is intended for use only by the above entities or users, their partners, affiliates or contractors.

This list covers the most common and popular parts and accessories for these radios as well as a few other commonly ordered items. Many other parts as well as batteries and accessories for other makes/models of radios and other equipment not listed here are also available upon request.

Most of the items listed are available for shipment within 1-3 business days with the exception of OEM L3 Harris repair parts (1-3 Weeks) and custom radio cases (1 Week). If you need your order to be rushed, shipping expedited or delivered before a specific date, please call to confirm availability and lead times.

Please feel free to contact us at any time with any questions you may have, or for a quote on specific quantities. If you received this list from an internal source instead of from your rep directly and would like your email to be added to the list to receive updated revisions, please let us know. Thank you for your time and consideration.

Ordering the correct antenna

WARNING: Using an antenna that is specified for the wrong frequency range or band can damage your radio.

If you are having trouble determining which antennas are appropriate and would like our help,
please feel free to call us any time at 208-628-9112. We are happy to assist you.

The first thing you will need to determine is what frequency ranges (MHz) your radio is designed and programmed to operate at. If you work for a company or agency, try asking whoever is responsible for maintaining the radios. Once you have determined what frequencies you use, match that up to the frequency range of the antennas available for your radio.

Example: If your frequencies are between 154.0000 - 158.0000, you should be looking at antennas rated for 150.0000 - 160.0000.

Once you have narrowed down your choices to a specific frequency range, you will need to decide which length of antenna you want and is appropriate. In general, a longer antenna will perform better than a shorter one.

TAC 1 Systems Buyers Guide **Parts & Accessories For** **L3 Harris, M/A-Com, GE & Ericsson Radios**

Remote Speaker Mics By Otto Engineering

TAC 1 Systems is a full line dealer of Otto Engineering audio accessories for L3 Harris radios. If you did not know, Otto manufactures most of the OEM accessories for L3 Harris radios, so in many instances buying an Otto audio accessory is essentially buying the OEM part.

OTTO Storm

- Ruggedized/Waterproof to IP68 and MIL-STD-810F.
- Hi/Lo volume control.
- **Red emergency button.**
- 2.5mm accessory jack.

The Storm™ speaker mic is a high-performance model designed for outstanding reliability when transmission clarity is imperative in professional environments. The durable, contoured design, push-button volume control and large, textured PTT button make the Storm™ the leading choice for demanding situations

OTTO Evolution

- Ruggedized/Waterproof MIL-STD-810F.
- Hi/Lo volume control.
- **Red emergency button.**
- 2.5mm accessory jack.

OTTO's original, field-tested Evolution™ speaker mic has been the trusted standard for public safety and military service personnel worldwide for nearly 30 years. It features a durable sealed housing with built-in debris screen and a robust internal speaker that delivers a bigger, more natural sound.

OTTO Revo NC2 **Noise Cancelling Mic**

- Ruggedized/Waterproof MIL-STD-810F.
- Hi/Lo volume control.
- **Red emergency button.**
- 2.5mm accessory jack.

The Revo NC2™ features a revolutionary patented noise-canceling (NC) microphone for optimum voice clarity even in high-noise situations. The compact, tapered design is built for rugged conditions including public safety applications and harsh industrial environments.

OTTO 500 Firefighting Mic

- Ruggedized/Waterproof MIL-STD-810F.
- Mic head & cable tested to **500°F!**
- **Red emergency button.**
- Removable front grill for easy debris removal.
- Large PTT for use with gloves.

The OTTO 500™ speaker microphone is the right choice for extreme fire-fighting environments. It's designed to withstand high-pressure water flow and function flawlessly even when exposed to temperatures as high as 500°F (260°C) for a full 5 minutes. The OTTO 500™ gives fire professionals critical minutes of communication that can mean the difference between life and death.

Remote Speaker Mics By Stone Mountain

Stone Mountain Phoenix

- Ruggedized/Waterproof IP68 rating.
- Hi/Lo volume control.
- **Red emergency/man down button.**
- 2.5mm or 3.5mm accessory jack.
- Available With Noise Cancelling.
- Made in the USA.

The Stone Mountain Phoenix remote speaker mic is available with premium features including a tactile PTT button, Hi-Lo volume button, red emergency button and 2.5mm, 3.5mm or 6-pin Hirose accessory port. The Phoenix is also designed, built and tested to IP68 and Mil-Std-810G standards for water immersion, wind driven rain, sand & dust, impact and vibration. Perhaps most noteworthy, the Phoenix is LOUD! Its high end 1W Neodymium speaker is capable of producing crystal clear voice audio at levels as low as 1 dB all the way up to 100+ dB!

Remote Speaker Mics By Impact

The Impact line of mics are more basic in their features, yet still of good quality. They are a perfect choice for budget conscious users who do not need advanced options such as emergency button.

Impact HD9-WP

- Ruggedized/Waterproof IP54 rating.
- Slim profile.
- 3.5mm accessory jack.
- Budget price point.

Impact HD7

- Ruggedized/Waterproof IP67 rating.
- Hi/Lo volume control.
- 3.5mm accessory jack.

Impact HD6

- Ruggedized/Waterproof IP67 rating.
- Hi/Lo volume control.
- 3.5mm accessory jack.

Impact HD2

- Ruggedized/Waterproof IP67 rating.
- Hi/Lo volume control.
- 3.5mm accessory jack.
